REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record, because none of the references in alone or in combination discloses:

A relaying method of relaying optical signals received from a first optical transmission line to a second optical transmission line, comprising the following steps of:

- receiving the optical signals from said first optical line;
- amplifying said optical signals by a first optical amplifier;
- amplifying said optical signals by a second optical amplifier; and
- transmitting said optical signals to said second optical transmission line,

as discloses in claim 1, 8 and 10.

The relaying method comprising all the step as discloses above is critically, since the device can be obtained a low noise figure (NIF) as well as dispersion compensation for an optical signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
